When working with the mixture, take care of personal hygiene and prevent contamination of work clothing and skin. If you have any doubts or when symptoms persist, seek medical attention.

**Exposure by inhalation**

Discontinue the exposure, remove casualty to fresh air, keep at rest and seek medical advice.

**Exposure by contact with skin**

Take off all contaminated clothing. After contact with skin, wash immediately with soap and water.

**Exposure by contact with eyes**

Rinse an open eye (hold eyelids with fingers) with plenty of water for about 15 minutes, transfer casualty to a specialist.

**Exposure by ingestion**

Rinse mouth with water, drink 1/2 l of lukewarm water, seek medical attention immediately, do not induce vomiting.

### 4.2 Most important symptoms and effects, both acute and delayed

None.

### 4.3 Indication of any immediate medical attention and special treatment needed

No data available.

## 5 Fire-fighting measures

### 5.1 Extinguishing media

**Suitable extinguishing media**

The mixture is not flammable, the measure should be adapted to burning substances in the surrounding area.

**Unsuitable extinguishing media**

None known.

### 5.2 Special hazards arising from the substance or mixture

None.
5.3 Advice for firefighters
Protective clothing, breathing apparatus.

6 Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures
Use personal protective equipment, see item 8. Observe the principles of work safety in chemical laboratories. Do not eat, drink or smoke.

6.2 Environmental precautions
Do not discharge into the drains, surface waters, groundwater.

6.3 Methods and material for containment and cleaning up
Absorb spilled agent with a suitable inert material (sand, earth, vapex) and store contaminated material in containers for collection of hazardous waste. For waste disposal see item 13. Sweep solid reagent and store in containers for collection of hazardous waste. For waste disposal see item 13.
